Hi [REDACTED],

I have added from some reviewers to this proposal as we discussed hopefully they should be ok for it to be processed in ground engineering.

Thanks

[REDACTED],

I am unsure about the correct home for this proposal. [REDACTED] always dealt with transport research related to rails and track ballast but reading the Transport Ops and management research area I don't really see where this fits?

Do you have an idea about the divide between this and ground engineering yet? If not shall we chat?

Thanks,

[REDACTED]
