Attachments: [Engineering RM.xlsx](#)

So, the reason I couldn't find you any other grants is because you have no new ones at all. However, to have a look at some recent grants in your portfolios, look in the March or May tabs of this spreadsheet and sort by [REDACTED] name. The one you're looking at with the complicated reviews would be a good place to start.

Equally, I suggest looking up grants from Grants on the Web on Siebel and seeing what their documentation says. A good idea might be to look at the Frontier Engineering grants in your area....

I only have a couple of new grants myself, but I suggest that you could do the checks on [REDACTED] for me in order to get an idea of what I was talking about earlier so that you can do it in anger when you have grants of your own. Are you happy to do this?

Finally (to keep you busy) I have a query about someone who wants to apply for a [REDACTED] [REDACTED] (I sit on a group that deals with this queries). I'll pass it to you and you can see how it fits with (1) the rationale for the area from your handover notes and our website, and (2) proposals you may have read from above etc.

Sorry for the brain dump ☺

Subject: Weekly Update - Examine and Initial Reviews

Hi All

Attached is a much smaller list than last week! I have removed proposals sent back for revision but will keep you informed once proposals are back with us.

Any queries, please let me know. Also please could I ask you to process your usability checks by Friday c.o.p so that I have a full view of what is going to June.

Thanks

[REDACTED]
