Hi All

Attached is a list of proposals which are still awaiting usability checks and some with reviews due very soon. The May meeting will close at cop today, so please could you let me know which proposals aren't going to make it (by e-mail please) then I can remove from the ROL and push through to June.

Please note that the meeting is close to maximum numbers so it may be that some of the younger proposals will need to be moved to June.

Thanks
