Dear [REDACTED],

Freedom of Information request: FOI2023/00330

Thank you for your Freedom of Information request received on the 2 June in which you requested the following:

Your request:

*I am writing under the Environmental Information Regulations 2004 and the Freedom of Information Act 2000 to request the release of information relating to NERC's funding of the Seabed Mining And Resilience To EXperimental impact project, Smartex (NERC Reference NE/T003537/1)
http://gotw.nerc.ac.uk/list_full.asp?pcode=NE%2FT003537%2F1&cookieConsent=A*

The expedition blog for the Smartex expedition JC241, conducted February - March 2023, states one of its key aims is to: "Understand the remaining impact of a realistic mining test on the seabed environment and its fauna after 44 years. We plan to revisit the OMCO (Ocean Minerals Company) test mining area where an experimental mining system was tested in 1979 creating tracks on the seafloor. Using a wide range of techniques we hope to map, photograph and sample this area to see how the tracks and the adjacent areas subjected to plumes have recovered in 44 years" <https://blogs.noc.ac.uk/jc241-smartex/introduction>

Your response to a previous request, EIR2023/00097, confirmed that UKRI does not hold the images relating to the 1979 tests.

This new request relates to the NERC-funded expedition on the RRS James Cook in February-March 2023. Please release photographs taken of the revisited OMCO test mining area on the JC241 expedition.

Our response

I can confirm that UK Research and Innovation (UKRI) do not hold any information relevant to your request.

We can confirm that the requested photographs of the revisited OMCO test mining area on the JC241 expedition are not held by NERC. We can advise that the information, if available, would be held by the National Oceanography Centre.

As part of our duty to advise and assist under the FOIA, you may find the following publicly available information of interest:
