CONSOLIDATED BIBLIOGRAPHY ON AIDS

Prepared February 1984

This is a consolidated bibliography of papers on acquired immune deficiency syndrome (AIDS) and Kaposi's sarcoma (KS). The original bibliography was published in February, 1983, and eight updates have been prepared during the last year. The first seven of these have been circulated previously; the eighth is included in this consolidated document.

The bibliography lists all papers and books on AIDS and KS published during the last six years. Every reference is numbered. Asterisks indicate citations which have been added to the list in the eighth update. Geographic locations in parentheses at the end of each clinical reference indicate patient origins. Each article has been evaluated for content and/or approaches according to the classification code shown on page 78. Beginning on page 82, all articles addressing each topic are listed by the appropriate code words. Numbers missing from the numerical listing do not represent omissions but indicate duplicated citations.

The AIDS Bibliography will no longer be produced by the National Institute of Allergy and Infectious Diseases, because a comprehensive bibliography with updates is now available from the National Library of Medicine, 8600 Rockville Pike, Bethesda, MD 20209.
