**EQUIPMENT DETAILS**

Description	Delivery Date	Country Of Origin	Total Value
-------------	---------------	-------------------	-------------

**ADDITIONAL FUNDING INFORMATION**

This additional funding stream of £200,742 is awarded to University College London ESRC IAA, grant reference ES/X004627/1, for the study entitled 'Review of Data Statistics and Research on Sex and Gender'.

The 'Review of Data Statistics and Research on Sex and Gender' will add value to the research landscape by facilitating accurate and consistent data collection on sex and gender identity, and by identifying barriers to research on sex and gender and providing recommendations to organisations to overcome these barriers. The activity will further enable UCL ESRC IAA to meet its stated aims and objectives, and to help researchers collaborate with communities, businesses, and policy makers.
