Please note, for the [Battery Innovation Concept Development Round 2](#)¹ competition, written assessment scores provided the threshold to determine which applications were invited to interview. Following interviews, each project received a new score based on interview performance and a portfolio approach was taken across the projects above the quality threshold to ensure maximum impact across the programme portfolio. Minimum, maximum and average successful scores provided are from the interview stage of the competition.

No interviews were conducted for the [Battery Innovation Feasibility Studies Round 2](#)² competition. Project selection for this competition was based on the written assessment scores only.

For question 10, where you have requested the names of the winning companies, the information requested is intended for future publication and is therefore exempt from disclosure under Section 22(1) of the FOIA; successful and confirmed awards are available in the public domain from [Innovate UK's Transparency Data](#)³. The requested information is expected to be published in early November 2026.

Section 22 is a qualified exemption meaning that it is subject to the public interest test.

UKRI understand that being transparent in regard to our competitions is in the public interest, however, we consider that premature release would put undue pressure on UKRI to publish outside of our scheduled timeframes which would lead to a disproportionate burden on the organisation. This would not be in the public interest.

We have therefore determined that the outcome of this test is that the public interest is insufficient to justify immediate disclosure.
