Subject: RE: URGENT FW: Freedom of Information request - Groundwater vulnerability data for England (Our ref: IDA 281856)

Dear [REDACTED]

Thank you for your request made under the Freedom of Information Act 2000. Your request concerns environmental information and therefore it has been considered under the Environmental Information Regulations 2004.

The data you have requested is already available to you, under an academic licence agreement, through our Digital Data Licensing service. Please contact digitaldata@bgs.ac.uk and send them a shapefile of your area of interest. They will check the area size you need and forward your request to our IPR team who will draw up a licence agreement. When the agreement is signed by your tutor we will be able to send the data to you.

I hope this fully answers your questions. If you feel we have failed to comply with your request in accordance with the requirements of the Regulations, you have the right to ask for an internal review (Regulation 11). Internal review requests should be submitted in writing within 40 working days after the date on which you believe we failed to comply with the requirements – normally the date of receipt of our response to your request. This should be addressed to The Complaints Officer at NERC, Polaris House, North Star Avenue, Swindon, Wilts SN2 1EU. There is no charge for this review.

Please remember to quote the reference number above in any future communications.

If you are not content with the outcome of the internal review, you then have the right to apply directly to the Information Commissioner for a decision. The Information Commissioner can be contacted at the Information Commissioner's Office, Wycliffe House, Water Lane, Wilmslow, Cheshire, SK9 5AF. Telephone: 08456 306060, or: 01625 545745. Subject: Freedom of Information request - Groundwater vulnerability data for England

Dear British Geological Survey,

I am writing to request access to the data for groundwater vulnerability in England to use for my dissertation - A GIS assessment of the subsurface and environmental constraints on future geothermal energy resources in the UK.

Yours faithfully,

[REDACTED]
