As per the information published in the [competition brief](#)¹, the total funding allocated for the Innovate UK Smart Grants: August 2020 competition is up to £25 million.

The exact figure is exempt from disclosure under Section 22(1) of the FOIA as it is intended for future publication. Section 22 is a qualified exemption meaning that it is subject to the public interest test.

UKRI understand that being transparent in regard to the total amount of funding provided is in the public interest. However, the data is still incomplete and we are of the view that releasing the information as it currently stands would be inaccurate, incomplete and misleading and thus not in the public interest.

To explain further, successful projects are required to complete various project set up steps, including providing Innovate UK with documentation, collaboration agreements and exploitation plans, as well as passing financial viability and eligibility checks in order to receive grant funding. Until these steps have been completed accurate total funding amounts cannot be confirmed.

Once these checks have been completed and the projects have moved past the setup phase and are live, their information, including total funding amount, is published in the [Innovate UK Transparency Data](#)².

We have therefore determined that the outcome of this test is that the public interest is insufficient to justify immediate disclosure. The exact date on when this information will be updated is dependent on when the projects complete the setup process.

If you have any queries regarding our response or you are unhappy with the outcome of your request and wish to seek an internal review of the decision, please contact:
