Questions 4 to 6 are split into two phases, as the projects over £500k had a two-stage assessment. The first was a written assessment and projects were then selected for interview on both the assessor score and the portfolio review criteria. Each project interviewed received an interview score from the panel and that second score was used to decide which projects to fund.

As further explanation for question six, Innovate UK applied a portfolio approach to this round. All applications selected for interview from Strand 1 scored over the quality threshold of 70%, and the Innovation Lead selected projects to give a balanced portfolio of different innovation areas. The written scores were then superseded by the interview panel scores. Projects in Strand 2 (under £500k) were selected top down until the competition budget was reached. More information on the portfolio approach can be found in the [Innovate UK General Guidance](#).¹
